github.com/pystander

Summary

Passionate and interest-driven data engineer with 2+ YoE, specializing in Big Data and Data Platform. Self-taught generalist across several fields. Participant of competitive programming contests on 3+ platforms (see [GitHub](#)), with 10+ years of programming experience since high school. A fast learner, team player, and a “chameleon” that adapts to fast-changing environments.

Work Experience

Data Engineer

Sep 2024 – Present

Lalamove

Hong Kong

- Developed and maintained 7+ big data applications and micro-services (APIs, databases, cloud servers, etc.) with high QPS (2k+ at peak) and throughput across 6+ overseas regions.
- Configured, built, and released rolling updates on distributed containers from CSPs to achieve high availability and zero downtime, based on internal CI/CD tools and workflows (i.e. DevOps).
- Tested applications with automated and manual test cases to ensure high coverage.
- Monitored above projects with metrics and alerts, and responded to incidents for >99.999% SLA.
- Supported users and developers on both technical and non-technical issues (bug fixes, documentations, etc.)

Keywords: Java, Spring Boot, MySQL, Phoenix, HBase, Redis, Doris, OLAP, Kafka, Kubernetes, Cloud Computing, AWS, Linux, Git, GitLab CI/CD, DevOps, Bash Script, Prometheus, Grafana, Jira

Summer Intern

Jun 2023 – Aug 2023

MTR Corporation Limited

Hong Kong

- Built and maintained a new ETL data pipeline from scratch with Python for internal room booking reports, and optimized it with multi-processing to reduce >75% time overhead.
- Developed web crawlers for 700+ Glassdoor employee reviews and conducted sentiment analysis with NLTK, and presented data in dashboards.
- Migrated and automated old Octopus application process with SharePoint List and Power Automate, from manual inputs to a new semi-auto flow.
- Assisted with UAT, ran test cases, and issued tickets using Redmine.
- Created dashboards and reports for ESG statistics.

Keywords: Python, Pandas, ETL, NLP, Data Crawling, Selenium, SharePoint, Power Automate, UAT

Technical Skills

Languages

Java, Python, C, C++, HTML/CSS, JavaScript, Bash Script

Databases

MySQL, HBase, Phoenix, Redis, Doris

Data & AI/ML

Hadoop, Kafka, Pandas, NumPy, PyTorch, Selenium

DevOps

Docker, Kubernetes, Linux, Git, GitHub, GitLab, AWS, Prometheus, Grafana, Jira

Web Development

Spring Boot, Flask, FastAPI, Jekyll

Education

The University of Hong Kong

Sep 2021 – Jun 2024

Bachelor of Engineering in Computer Science, *Second Class Honours (Division One)*

cGPA 3.32 / 4.3

PolyU Hong Kong Community College

Sep 2019 – Jun 2021

Associate in Engineering, *Distinction*

cGPA 3.77 / 4.0
